

## Middlesex Water Announces 2021 Fourth Quarter and Year End Results

February 25, 2022

ISELIN, N.J., Feb. 25, 2022 (GLOBE NEWSWIRE) -- [Middlesex Water Company](#) ("Middlesex" or the "Company") (NASDAQ:MSEX) today announced financial results for the fourth quarter and year ended December 31, 2021.

### 2021 OPERATING RESULTS

Consolidated operating revenues increased to \$143.1 million for the year ended December 31, 2021, up \$1.5 million from 2020. The increase in operating revenues is primarily due to customer growth and increased water consumption related to higher demand from residential customers in our Delaware water systems and a full year of revenues from our contract to operate and maintain the Highland Park, New Jersey water and wastewater systems.

Operation and maintenance expenses for the year ended December 31, 2021 increased to \$73.7 million, an increase of \$2.9 million from the same period in 2020. Higher weather related main break activity in the Middlesex system during the winter months drove \$0.5 million in additional costs. Other factors contributing to the increase were labor, business insurance premiums, transportation fuel prices and outside consulting services prompted by higher utility regulatory activity, including compliance with America's Water Infrastructure Act of 2018.

Depreciation expense for the year ended December 31, 2021 increased to \$21.1 million, an increase of \$2.6 million from the same period in 2020 resulting from a higher level of utility plant in service, including the completion of a major upgrade at our largest water treatment plant in New Jersey.

Net income for the year decreased \$1.9 million to \$36.5 million, compared to \$38.4 million in 2020. Earnings applicable to common stock for the year ended December 31, 2021 were \$36.4 million, or \$2.07 per share on a fully diluted basis, compared to \$38.3 million or \$2.18 per diluted share for the same period in 2020.

"We had been at the end of our historical ratemaking cycle in 2021 in light of significant capital investments over the past several years. These investments were acknowledged by our New Jersey regulators through a rate increase effective in January 2022. We remained focused on our major capital construction program in 2021 as evidenced by the completion of our new ozone treatment facility at our largest treatment plant in New Jersey. Having that facility in place positions us to better manage capacity and water quality and is integral in helping to ensure resilience in the face of climate and other operational anomalies. In addition, we continue to make progress in rehabilitating our New Jersey wellfield treatment facility to comply with new regulatory water quality requirements for groundwater in New Jersey. The strategic execution of these projects, our annual RENEW Program and our most recent announcement of our Lead Service Line Replacement initiative are all means by which Middlesex Water is working to further enhance drinking water quality and preserve and protect public health, while simultaneously driving shareholder value" said Middlesex Chairman, President and Chief Executive Officer Dennis W. Doll.

### FOURTH QUARTER 2021 RESULTS

For the three month period ended December 31, 2021, operating revenues were \$34.0 million, down from \$34.6 million for the same period in 2020. Operations and maintenance expenses were \$18.4 million, up from \$18.0 million for the same period in 2020. Net income decreased to \$7.2 million from \$8.3 million for the same period in 2020.

### QUARTERLY DIVIDEND DECLARED

As previously announced in January 2022, the Board of Directors of Middlesex Water Company declared a quarterly cash dividend of \$0.29 per common share payable on March 1, 2022 to shareholders of record as of February 14, 2022. The Company has paid cash dividends continually since 1912 and increased its dividend for the forty-ninth consecutive year in 2021.

### ABOUT MIDDLESEX WATER COMPANY

Established in 1897, Middlesex Water Company serves as a trusted provider offering life-sustaining high quality water service for residential, commercial, industrial and fire protection purposes.
