

## MIDDLESEX WATER COMPANY DRINKING WATER QUALITY REPORT NOW AVAILABLE

**ISELIN, NEW JERSEY July 1, 2022** -- Middlesex Water Company's and its affiliates Annual Drinking Water Quality Reports are now available. Company specific Water Quality Reports can be accessed at: <https://www.middlesexwater.com/water-quality/>.

The purpose of water quality reports is to inform customers about the source of their drinking water, the quality of their water supply, testing results performed during 2021 and ongoing efforts to maintain the highest standards.

Our "[Water for Tomorrow®](#)" infrastructure campaign is a multi-year, multimillion-dollar initiative to further enhance our water delivery network in New Jersey, maintain and improve system pressures and available storage, reduce lost water and continue to maintain the safety of our treatment process. This includes our annual RENEW Program where we replace valves, hydrants, water mains and service lines. The RENEW 2022 Program has expanded to now include the identification and removal of lead and galvanized steel service lines on both the customer-owned and company-owned portions of the service lines. This measured approach, within a defined RENEW project scope area, enables the Company to strategically and efficiently perform as many upgrades as possible while minimizing repeated impact to customers.

Middlesex Water encourages everyone to join in protecting drinking water sources for current and future generations by considering the following:

- *Check with your local municipality to learn how to dispose of household hazardous wastes such as motor oil, paint and pharmaceuticals properly.*
- *Keep chemicals and debris out of storm drains, which may flow into surface waterways.*
- *Limit the use of fertilizer, pesticides and herbicides on your property.*
- *Practice wise water use (repair leaking faucets or toilets, etc.)*
- *Consider installing WaterSense® labeled water-efficient products.*

### **About Middlesex Water Company**

Established in 1897, Middlesex Water Company (NASDAQ:MSEX) serves as a trusted provider offering life-sustaining high quality water service for residential, commercial, industrial and fire protection purposes. The Company offers a full range of water, wastewater utility and related services. An investor-owned public utility, Middlesex Water is a professional services provider specializing in municipal and industrial contract operations and water and wastewater system technical operations and maintenance. The company and its subsidiaries form the Middlesex Water family of companies, which collectively serve a population of nearly half a million people in New Jersey and Delaware. The Company invests in its people, infrastructure and the communities it serves to support reliable and resilient utility services, economic growth and quality of life.
