

TIDEWATER ENVIRONMENTAL SERVICES, INC. TO HOST OPEN HOUSE FOR WANDENDALE TREATMENT FACILITY

Sussex County, DE. March 28, 2011 Tidewater Environmental Services, Inc. will host two open house sessions on April 13 at 11:30 a.m. and 4:30 p.m. at the Bayfront at Rehoboth Community Center, 31767 Marsh Island Avenue, Lewes. Local residents will have the opportunity to learn about Tidewater's proposal to build the Wandendale Regional Wastewater Treatment and Disposal Facility on Camp Arrowhead Road.

“Our facility will produce clean water through environmentally-friendly treatment technologies and protect our surrounding wells and water bodies for the residents of Sussex County,” said Gerard Esposito, President of Tidewater Utilities, Inc. “This project will create new jobs and help boost the local economy.”

During the sessions, company representatives will discuss social, environmental and economic benefits of the project. The development is expected to create approximately 330 construction jobs and thousands of dollars in increased tax revenues.

Wandendale Treatment Facility will provide clean water, essentially meeting drinking water standards, and eliminate unnecessary and costly septic systems. Neighbors, local businesses, and Sussex County residents are encouraged to attend.

Tidewater Utilities, Inc., together with its wholly-owned subsidiary, Southern Shores, provides water services to approximately 34,000 customers for domestic, commercial and fire protection purposes in over 300 residential communities and commercial establishments in New Castle, Kent and Sussex Counties, Delaware.
